The signatures to the document cannot be added in the Beneficiary Module. They need to be added either physically or digitally by the responsible persons after the document has been generated.

The number of required signatures depends on the phase of the activity. Before the mobility, at Learning agreement stage when the mobility activity is being planned and expected learning outcomes are being prepared, signatures of the sending organisation, the hosting organisation, and the participant (and parent/guardian for minors) are obligatory to make sure that all parties agree to the same activity plan. Signatures of these parties cannot be replaced by other organisations or actors, such as supporting organisations.

At post-mobility stage when the mobility activity has been completed and the achieved learning outcomes are being documented, it is sufficient for one organisation to sign the document: either the sending organisation or the hosting organisation. Additional signatures are optional if needed due to national rules or for other reasons.

In this context, a responsible person is a representative of the sending or host organisation who can sign on behalf of the organisation. This can be the director, principal, another member of the organisation's management, the project manager, or another person, depending on the organisation's structure and repartition of duties.
