

OLA and the new Erasmus+
single point of entry for
students

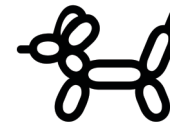

Jeroen van Lent
EUF

Challenge #1

How to know that a student using the tools is actually one?

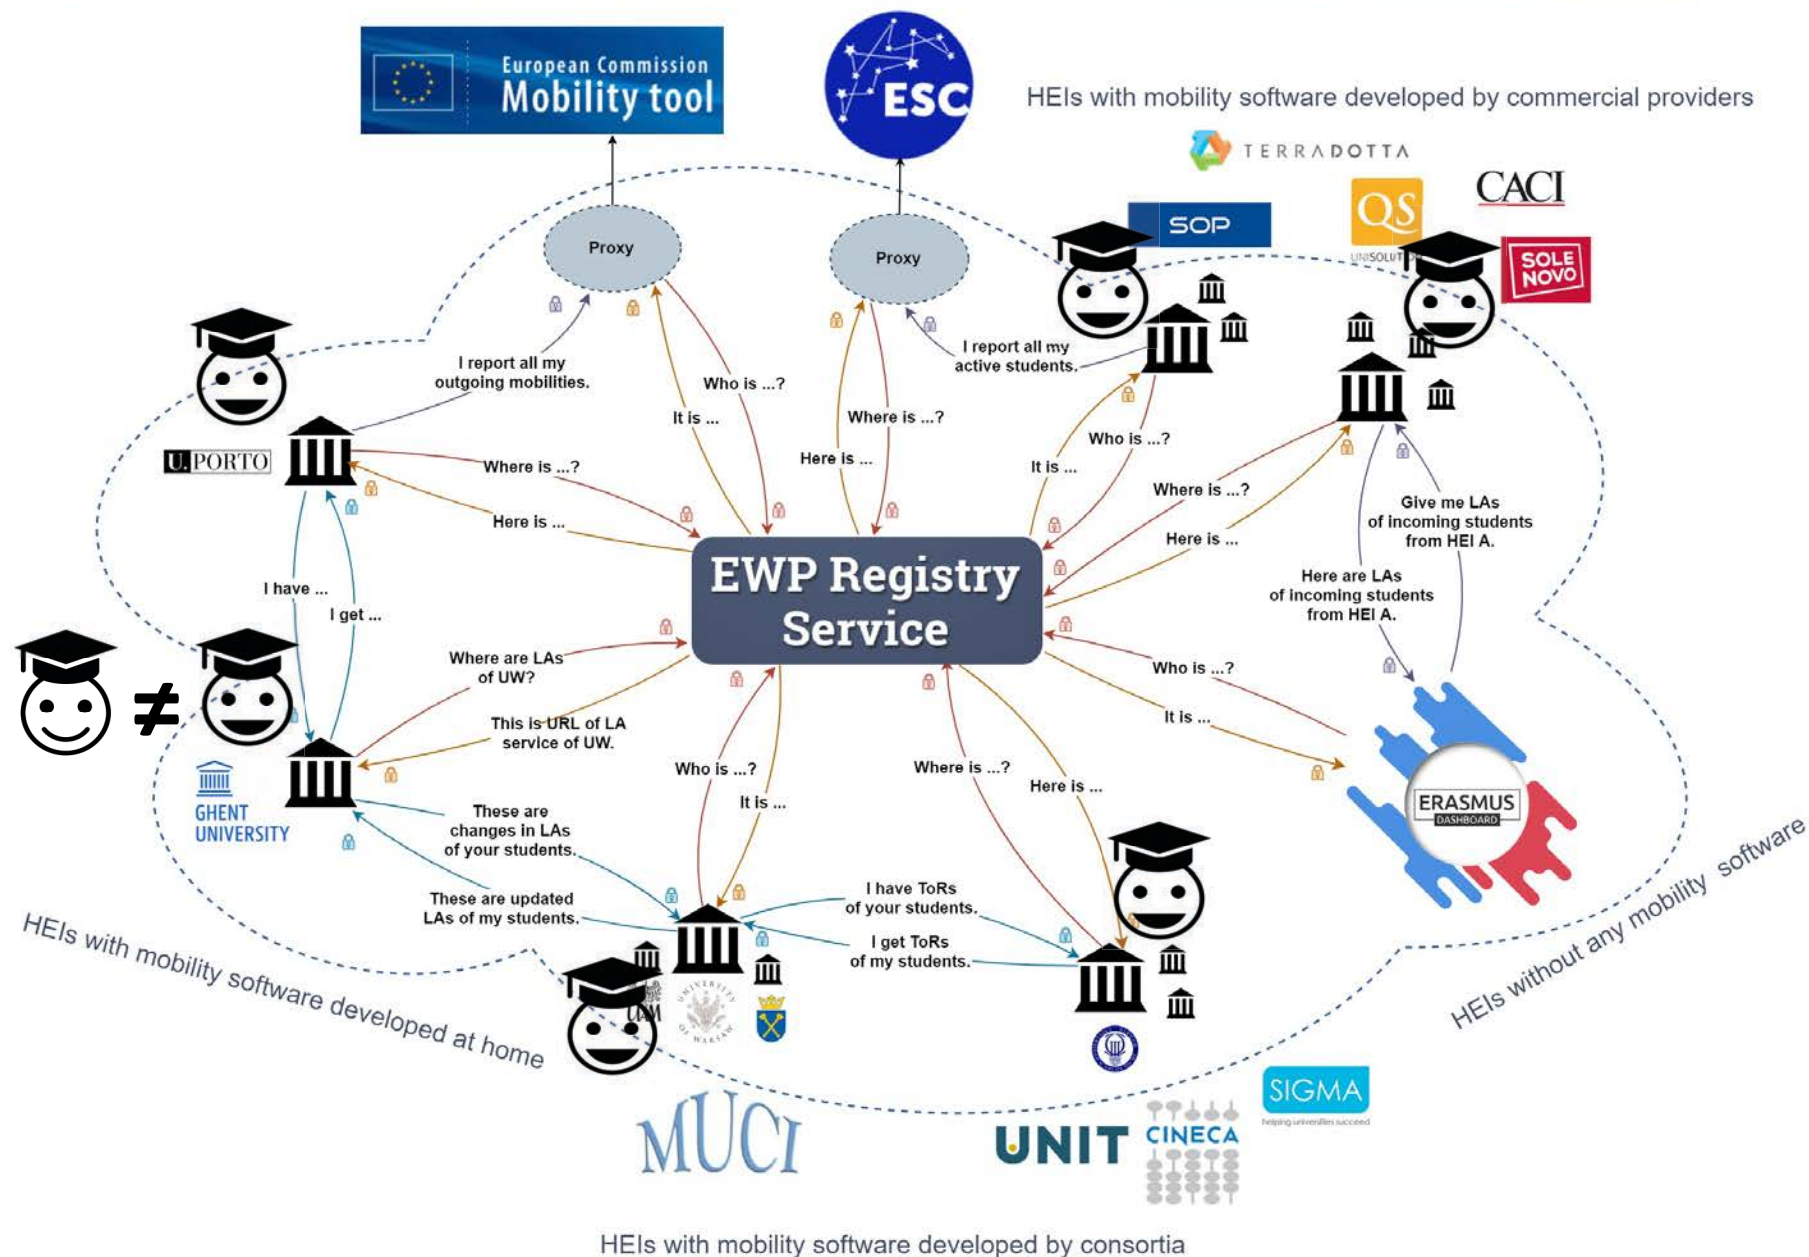

Challenge #2

How to ensure that different systems consistently recognise a given student as the same student?

EWP Network Infrastructure

Challenge #3

Further development: enabling new functionalities requires knowing additional information about the student beyond their status
[e.g. university of origin]

Requirements

Erasmus services require to know
**who a person is and what their home university is
across services & tools**

MyAcademicID

The link between student mobility and eIDs

Possible
solutions

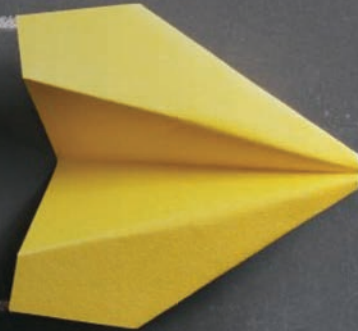

Federated authentication

A unique European Student Identifier

Knowing who a student is

#1 OLA and App login

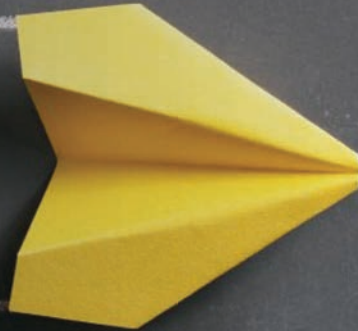

#2 Pre-filling information

Identifying a student

European Student Identifier

<https://wiki.geant.org/display/SM/European+Student+Identifier>

urn:schac:personalUniqueCode:int:esi:auth.gr:23456790G

Namespace for the
European Student Identifier

schacHomeOrganization

Student
Identifier

ESI Specification

#3 EWP mix & match

#4 Smart redirect

#5 OLS and MT+

Using this solution to
make IT work!
